Algivon®
Alginate dressing impregnated with 100% Manuka honey

Actilite®
Non-adherent viscose net dressing coated with 99% Manuka honey and 1% Manuka oil

Actilite®
Non-adherent viscose net dressing coated with 99% Manuka honey and 1% Manuka oil

An inexpensive and highly effective broad spectrum antimicrobial dressing containing 99% Manuka honey and 1% Manuka oil for use on low to moderate exuding wounds. The dressing is designed to protect a wound, promote healing and allow the passage of exudate. It is an ideal choice for epithelialising wounds that are perceived to be at risk of re-infection.

NEW! Larger sizes including the unique 30cm x 60cm

Light, flexible, low profile knitted net dressing ideal for use under compression

Lower concentration of honey reduces potential for initial drawing sensation

Can be used in combination with TNP

Non-adherent, reducing pain and trauma

Can be cut or folded to the shape of the wound

Lightweight versatile dressing solution to be used when there is a clinical sign of infection and to prevent re-infection

The Activon® range contains all the well-known benefits of manuka honey as a broad spectrum antibacterial product, effective against most wound invading bacterial that are well known in today’s healthcare environment. These include Staphylococcus aureus, Pseudomonas aeruginosa, VRE and possibly the best known, MRSA - challenging the need for routine antibiotics to treat wound infection.

Activon® is a natural alternative to the more common wound therapies such as silver, with none of the perceived challenges silver products face today, such as their cost-effectiveness, lack of efficacy and concerns around their safety/resistance.

Your patient outcomes can be improved when our Activon Manuka Honey® dressings are used in conjunction with our Eclypse® range of super-absorbers.

In-vitro clinical trials have demonstrated that low concentrations of Advancis Manuka honey prevented biofilm formation in MSSA, MRSA and VRE, whilst still maintaining its antimicrobial properties

Effective debridement capabilities for faster wound bed preparation

Deodorises wounds, positively impacting on a patient’s quality of life

Maintains a moist wound healing environment, facilitating faster healing of chronic wounds

Extensive range of Advancis Manuka honey dressings, allowing the right dressing selection for each wound type

Honey is non-cytotoxic and is a completely natural substance

Advancis Medical® bring the benefits of 100% Manuka honey into a versatile suite of wound healing that enable you to choose the right dressing for every phase of wound healing.
